

Phoenix radio

Intern

Most of my, most of my day erm revolves around music and the radio industry, getting, getting pre-recording shows for like different nights of the week an I work from pre-recordings in the morning to doing my own live show in the afternoon. I've gained self confidence, erm learning to work with different people and with different students as well. If you want to fulfil your dream, just fulfil it in any sort of career you really want to do. Just sort of like embrace your confidence more, just surprise everyone with what you can do, and just support them.

Representative

Groupwork have been in touch with Phoenix to err, see if we, we were able to, to offer placements. It's proved successful, you know, from, from the word go really. Think it's a good, it's a good way of integrating a business.
